

# If Your Dog Is Limping...

Your Dog may have a torn ACL / CCL injury. Posh Dog Knee Brace offers effective, non-surgical, holistic solutions for Dogs with torn knee ligaments. Many dogs have made a full recovery from a full or partial ACL CCL knee tear, wearing a Posh Dog Knee Brace, and with conservative management.

The therapeutic **Posh Dog Knee Brace** does all this and more:

- 🐾 Globally stabilizes the knee joint allowing your Dog to walk pain-free.
- 🐾 Allows an *immediate* recovery process, unlike surgery, which creates a new injury that requires a minimum 90 day recovery period, barring complications.
- 🐾 Is ¼ the cost of typical surgery and post-op care.
- 🐾 Provides risk-free, painless recovery – unlike surgery.
